* Special order 90# - 100# draw weights are available on the Tribute only. Draw weights of 90 lb and 100 lb are not covered by the BowTech Warranty.

Performance testing is completed using a Custom Chrono, Heavy Duty ProShop Meter and digital scales (digital scales have a variance of +/- 1%). Speed ratings have been obtained with factory installed brass nock and Hush Kit. The use of these accessories decreases velocity by 5-8 fps. † Mass bow weights are taken with these accessories installed.

IBO speed ratings are the industry standard and are calculated using an arrow weighing 5 grains per pound (350 gr) at 70# draw weight with a 30" draw. Speeds for the Equalizer are achieved using a 300-grain arrow at 60# with a 27" draw.

All models feature an adjustable let-off range of 65% to 80% and draw length modules available in 1/2" increments.

All Binary Cam models, except for the Equalizer and Constitution, have the option of either the speed or ultra-smooth module.

Target options available in hydrographic transfer Black Marble, Red Polished Chrome, Blue Polished Chrome and Clear Polished Chrome. Target Colors: add \$50 for Black Marble— add \$100 for Red, Blue or Clear Polished Chrome.

Anodized target colors are also available on the Constitution only in Black/Pewter, Black/Red, and Black/Blue for an additional \$50 fee. Subject to stock availability. TomKat is available in camo patterns only.

All bows feature Mossy Oak Obsession® camo. Add \$50 for Special order camo finishes in Advantage® Max 4 HD, Realtree Hardwoods HD®, and RealTree Hardwoods Green HD®.
